

## **Interfacing with Rescue Dog Operations**

Lesson 1: 11:47

An inside look at the teams who train search and rescue dogs; the structure of these groups, their commitment, resources, basic and specialized training. Featured in this segment are basic training skills, handler-dog interaction, search skills and techniques in the field (finding objects, searching cars, rigging and rappelling from aerial ladders).

Lesson 2: 11:16

An inside look at the teams who train search and rescue dogs; the structure of these groups, their commitment, resources, basic and specialized training. Featured in this segment are three evolutions: confined space, building rappelling, and using a zip line.

Lesson 3: 9:35

We conclude our look at the teams who train search and rescue dogs; the structure of these groups, their commitment, resources, basic and specialized training. Featured in this segment are how water rescues are conducted using canines: search patterns, dog response, and boat crew operations.
